

ActiveNav Cloud

High performance, low cost, secure cloud service for sensitive data discovery and cleanup across all your on-premise and cloud unstructured data repositories. Build an always-on inventory in record time.

Sensitive data audit, right out of the box

Purpose-built for unstructured data discovery, ActiveNav Cloud provides deep insights and delivers a sensitive data risk audit in a single pane of glass, right out of the box.

Understand your data risk big picture

Our proprietary classification and data scoring shows your overall risk exposure across all connected repositories. Sensitive data hotspots let you drill in to mitigate the problem.

Low footprint, high performance

As a true SaaS solution, ActiveNav Cloud costs very little to deploy and maintain. Its scalable and fast so you can continue to monitor data compliance and maintain an ever green data inventory.

The benefits

- High performance unstructured data discovery
- On-premise and cloud repositories
- Classification and regulated data risk scoring
- Single pane of glass visualisation across all discovered data
- Unstructured data inventory and compliance data map
- Data risk hotspot identification
- Targeted search and data subject access request fulfillment
- Aging, stale, duplication and unwanted data metrics
- Managed review and disposal decision making
- Audit trail for defensible disposal

"ActiveNav is a vital tool to help us in our organisation's journey of determining the age and the risk scores of our accumulated unstructured data. Helping us be in compliance with record and information regulations and sustain a leaner document, records and information repositories"

Ruvilyn Gatchalian, CIP

Electronic Records Advisor, Black Gold School Division, Canada

› Use cases

Privacy compliance

One of the foundations of privacy compliance is a reliable data map. For unstructured data repositories, ActiveNav Cloud digs deep and keeps your data map current. Its unique visualisations provide key insights to prioritise and drive defensible data disposal and its targeted search delivers DSAR fulfillment across all discovered data.

Regulatory and security compliance

Information governance and stewardship extends beyond privacy regulations. ActiveNav Cloud covers data elements subject to any other regulation and can be configured for your organisation's information security policies. In this way it underpins your entire information governance and compliance program.

Breach preparation and recovery

Experiencing a breach is inevitable; it's just a matter of when. ActiveNav Cloud discovers and scores regulated and crown jewel data across all unstructured data repositories, enabling you to mitigate the impact before it happens. After any breach event, you can immediately identify what was compromised and manage your response based on the facts.

Data cleanup

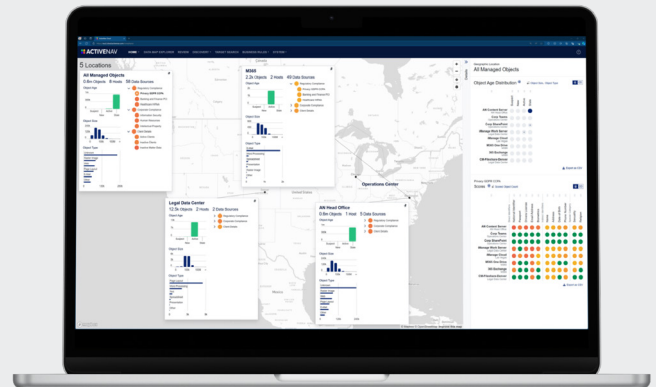

ActiveNav Cloud builds and maintains an evergreen inventory of all of your unstructured data. In addition to sensitive data scoring, it provides insights for aging, stale, duplicated and no-value data. This means that clean up can be effectively directed and orchestrated across all of your unstructured data to reduce costs and drive efficiencies across your infrastructure.

› Grace partners with ActiveNav

Grace is a certified business partner of ActiveNav, a data privacy and governance software provider and innovator founded in 2008. ActiveNav enables users to identify toxic data hotspots and prioritise their minimisation efforts. Organisations can use ActiveNav to discover, clean, classify, quarantine, and delete sensitive, redundant, obsolete, and trivial data. Hundreds of leading companies and government agencies trust ActiveNav to help them control sensitive data and support compliance with privacy regulations such as the CPRA and GDPR.

The ActiveNav difference

- 15 years of experience
- 6 continents and 28 countries
- 15+ billion files discovered
- 30K+ hrs customer deployments
- 300+ customers and counting
